A case earns reuse when its operating clauses are explicit.

Illustrative baseline: recurring finance review. This is a hypothesis for discovery, not a claim about current Ontra processes.

WORK Prepare a recurring variance-review packet from approved source materials; preserve traceability to underlying records.	VALUE Reduce manual assembly and improve reviewer completeness without replacing finance judgment.	HUMAN AUTHORITY A finance leader validates interpretation, approves conclusions, and owns exceptions.
BOUNDARY Use approved sources and tools only; exclude unsupported inference and sensitive data not authorized for the workflow.	ADOPTION Begin with one recurring review, named users, examples, office hours, and feedback after real cycles.	EVIDENCE Measure preparation time, completeness, correction rate, reviewer confidence, and retained use before broader reuse.
EVIDENCE STATE Bounded practice	ACCOUNTABLE OWNER Finance workflow owner	PRECEDENT DECISION Capture reusable review clauses; preserve finance-specific context.
